

The purpose of this report is to provide summary data on the radioactive waste, spent nuclear fuel, 11e(2) byproduct material, contaminated media, and non-radioactive waste managed by the U.S. Department of Energy. The intended audience is waste management professionals and other interested stakeholders. The Department of Energy's Environmental Management program produced this document with assistance from numerous Department of Energy personnel, contractors, and independent experts.

To obtain copies of this report or for more information on the environmental management activities of the Department of Energy, please contact:

One of the primary data sources for this report is the Central Internet Database (CID). The CID provides the first set of national-level Department of Energy waste management and cleanup data made available to the public through the Internet. This report is available on the CID website, which can be accessed at:
